## Clinical Diagnosis / Suspected Etiology / Syndrome
- Clinical diagnosis
- Normal cognition
- Dementia
- Alzheimer’s disease / LOAD
- Early-onset AD
- Pre-clinical / pre-symptomatic Alzheimer’s disease
- Mild cognitive impairment (MCI)
- Impaired, not mild cognitive impairment
- Lewy body dementia
- Frontotemporal dementia (FTD)
- Vascular dementia
- Primary progressive aphasia (PPA)
- Huntington’s disease
- Prion disease
- Parkinson’s disease
- Down syndrome

## Clinical Measures and Symptoms
- Blood pressure
- Height / weight
- HIS and CVD / Hachinski ischemic score
- UPDRS / parkinsonism
- Gait disturbance / tremor / other movement disorders
- CDR / CDR global score / CDR sum of boxes
- NPI-Q / neuropsychiatric symptoms
- GDS / Geriatric Depression Scale / behavioral assessment
- FAQ / functional impairment / functional decline
- Neurological exam / focal deficit
- Subjective memory complaint
- Cognitive symptoms
- Behavior symptoms
- Motor symptoms

## Neuropsychological Testing
- Neuropsychological tests
- MMSE
- Test norms
- Domains
- Composite scores
- Test language
- Dysexecutive function

## Demographics and Characteristics
- Education
- Sex
- Race
- Ethnicity
- Primary language
- Age
- Oldest old
- Living situation / residence type
- Family history of dementia
- Informant demographics / characteristics
- Differences by Center / region

## Subject Health History
- Vascular risk factors
- Cardiovascular disease
- Cerebrovascular disease / stroke / TIA
- Parkinsonism
- Seizures / epilepsy
- Traumatic brain injury / TBI
- Hypertension
- Hypercholesterolemia
- Diabetes
- Depression
- Alcohol
- Smoking
- Sleep apnea
- Psychiatric disorders
- Medications
- Age at onset of cognitive decline

## Neuropathology / Death
- Death
- Neuropathology
- Autopsy
- Vascular pathology
- Braak stage
- Neuritic plaques
- Lewy bodies
- Tauopathies
- Frontotemporal lobar degeneration (FTLD)
- Corticobasal degeneration (CBD)
- Progressive supranuclear palsy (PSP)
- Pick’s disease
- Hippocampal sclerosis

## Genetics and Biomarkers
- GWAS
- APOE
- MRI
- PET
- Biomarkers
- APP/PS1/PS2 mutations
- Other genetic mutations / chromosomal abnormalities
- Specimen or tissue request

## Study Design
- Cross-sectional
- Longitudinal
- Cognitive decline / transition
- Statistical methods
- ROC analysis
- Missing data methods
- Latent class modeling / factor analysis
- Epidemiology
- Descriptive / exploratory
- Clinicopathological / diagnostic accuracy
- Risk factors
- Survival Analysis / prognosis
- Clinical trial eligibility
- Criteria / guidelines
